### MORE THAN A BROKERAGE EVENT

A partnership was concluded with PLASTIPOLIS that organised the Smart Plastics Congress offering the attendees of the brokerage event the possibility to attend the round-tables and the lectures. As an excellent example, the Kunststoff Institut Lüdenschied in North Rhine Westphalia (Germany) could take advantage of the two events. The German and the French clusters are both working with their Enterprise Europe Network local points for their internationalisation.

### NETWORKING EVENT

The common social event took place in Espace Grammont in the center of Besançon. On this occasion, a unique Christophe RAYMOND showcase was offered to the participants. The musician presented the IRIS MIDI VIOLIN created by Hervé PRUDENT in Besançon and manufactured by BECARRE SAS HP LUTHERIE.
